

Private company «ServiceEnergoGroup» is a legal entity which carrying out activities related to oil and gas industry worldwide. The company was established in 2009 by oil and gas extraction highly professional experts. Company personnel contracted with the largest national oil and gas extraction companies in Ukraine such as Ukrnafta, Ukgasvydobuvannia, Chornomornaftogas.

Our engineers have prepared whole design, documentation and specification (MDP) for the developing three oil fields in Islamic Republic of Iran. We have also done complete technical study and positive economical analysis for the installation of compressor station at the oil(gas) field that belongs to National Kazakhstan's Company «KazMunayGas».

The experienced and certified company staff which applies modern methods: from definition of oil and gas prospect deposits area to implementation of optimal solutions of field development, together with appropriate designed software, provides strategic and highly proficient consultations on achievement of scheduled volumes of hydrocarbon extraction.

### Main activities of the company

- Evaluation of perspective lines of development and exploration of oil, gas and gas-condensate, development of project documentation as well as and exploration and appraisal works;
- Geological and economic analysis of sites (calculation of oil, gas and condensate reserves) feasibility study on coefficients of hydrocarbon extraction;
- Geological and economic analysis of sites (calculation of oil, gas and condensate reserves) feasibility study on coefficients of hydrocarbon extraction;
- Development of permanent acting geological and dynamic formation model;
- Development of project-budget documentation on construction or reconstruction of hydrocarbon deposits sites;;
- Development of project-budget documentation on construction of oil and gas wells, conduct of field development engineering;
- Development of technological processes, pieces of equipment, units for increase of oil extraction;
- Development and implementation on oil and gas gathering, processing and transportation;
- Elaboration of gas transmittal pipelines of all diameters and pressures;
- Development of inline parts connections of pipeline (pig send and receive points);
- Development of auxiliary facilities (gas compressor stations, junction joints);
- Development of activities and elaboration of required documents on conservation of mineral resources and environment, conduct of environmental monitoring;
- Environmental audit of refinery, investment feasibility study for new wells construction;;
- Planning and wells workover;
- Selection of most competent approaches aiming of hydrocarbon extraction in bottomhole formation zone.

### Partners

**Within company performance we have successfully provided services to a following oil extraction companies as well as research and development enterprises**

- Ukrainian-Canadian Joint Venture «Kolomya Oil and Gas Company "DELTA"»
- "SVENSKA CAPITAL OIL" and "CAPITAL OIL UKRAINE"
- Subsidiary company "KADOGAN UKRAINA Ltd" of CADOGAN PETROLEUM PLC CORPORATION
- Subsidiary company "UNESCO UKRAINA" of UNESCO INTERNATIONAL inc"
- LLC "KAZNEFTEGAZPROM" (Republic of Kazakstan)
- PJSC "Tekhnoresource";
- LLC "Azov Petroleum LLC";
- LLC «ASTRO-SERVICE»;
- LLC "Astroinvest Energy"
